

Key Features

- Design for Top Mounted Pan Tilt Motors
- Allows for easy night-vision upgrade to current PTZ systems.

Product Description

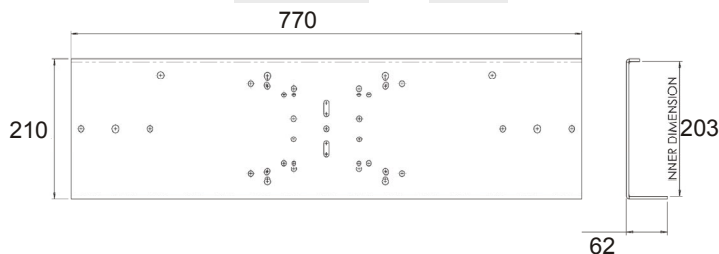

A flat-top motor adaptor plate for a variety of pan-tilt motors to combine with the installation of two SuperLED™ or UF500 infrared illuminators.

This allows existing CCTV systems with flat top motors can be upgraded to achieve night surveillance performance.

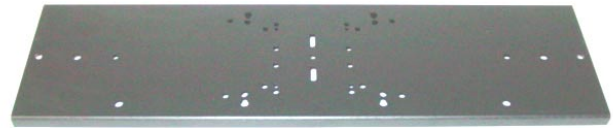

NOTES:

1. Ensure power cables from ZXLED illuminators have enough slack to allow required pan-tilt movement.
2. For night performance to 700 feet, use camera model FSX800, IR suitable lenses and ZXLED at 850 nm wavelengths.
3. Ensure motor programming does not allow greater than +360 degree panning, which could cause cable entanglement.
