

## Question

Who has the **most powerful, most effective** active infrared illuminator commercially available today?

## Answer

**Extreme CCTV**

## Proof

In a **US Army** comparison, the SuperLED greatly outperformed other night vision devices\*.

US Army Report Highlights:  
**“Excellent”** at 150m (~500ft)  
**“Very good”** at 200m (~650ft)

Other Report quotes:  
**“Incredible detail”**  
**“Fantastic clarity”**

Notes:

- Above ratings used only single-mount illuminators. Dual SuperLEDs will allow for greater distances.
- Infrared illuminators made by others were rated as “unusable” at only 150m.

## Number One in Night Vision

Extreme CCTV Night Vision is field-proven in the world’s most demanding applications. Extreme’s award-winning Night Vision is chosen by defense organizations responsible for Homeland Security.

### The Most Powerful Infrared Illuminator to Security Professionals

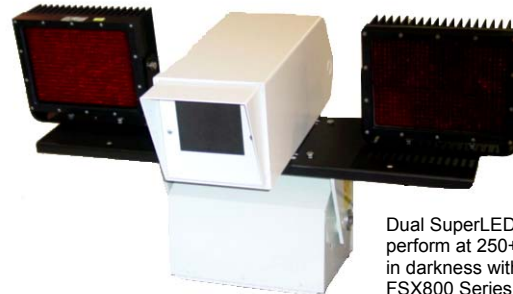

The SuperLED combines supercharged high-performance infrared with solid-state durability to double infrared output while using minimum power. The result is a reliable long-life illuminator that delivers Night Vision performance well and beyond anything else on the market.

#### Applications

- Critical infrastructure
- Industrial sites
- Water reservoirs
- Military bases
- Airports
- Ports and borders

#### Key Features

- Long distance Night Vision to 250+m (800+ft)
- Semi-covert 850 nm & covert 940nm
- Greater than 5-year life expectancy
- Energy efficient operation

Dual SuperLEDs can perform at 250+m (800+ft) in darkness with the FSX800 Series camera.

## FACT

At the Department of Defense’s last **FPED** (Force Protection Equipment Demonstration) show, the night belonged to Extreme CCTV.

Extreme’s active infrared incredibly illuminated the entire field of view to capture video surveillance pictures of these soldiers at 200 yards away in total darkness.

SuperLED and other Extreme CCTV infrared models are available now for summer installations.
