Extreme CCTV EX36 to Watch Over Notorious Iraqi Prison Toughened Corner-Mount Camera to Provide 24/7 Cell Surveillance

Extreme's new EX36MNX will be applied for extreme surveillance at one of Iraq's most notorious prisons. The vandal-resistant corner camera will be used inside prison cells to obtain views of the entire room in day and dark conditions. The EX36, known inside the correctional industry as the "suicide cell" camera, combines precision optics with a large LED infrared illuminator array for outstanding night vision. The new EX36MNX model incorporates a newly developed mechanical filter that adjusts for the type of light reaching the CCD sensor. The size of the contract and other project details have been withheld.

The EX36, which is specified for use in important prison security projects around the world, will be granted a U.S. Patent in the upcoming weeks. The EX36's unique shape, gripless anchor-free construction and dual 1/4" Lexan plate windows make the EX36 the indestructible camera of choice for prison authorities throughout the world.

"The EX36 camera became significant to the corrections industry after an inmate successfully sued for damages after his own suicide attempt," says Jack Gin, President and CEO of Extreme CCTV. "These cameras are here to protect both the inmate and the correctional authority."

Further details on this patented award-winning technology are posted on www.ExtremeCCTV.com.

The EX36's design allows entire views of 15 x 15ft rooms including below the camera itself. The new EX36MNX model incorporates a day-night mechanical filter for exceptional 24/7 performance.

Extreme CCTV designs, manufactures and markets extreme application, all-environment high-performance CCTV surveillance camera systems and infrared illuminators for technical surveillance throughout the world. Extreme CCTV's security cameras and night vision equipment have reached end users on all seven continents. For more information on Extreme CCTV products, visit www.ExtremeCCTV.com.
